# 1 Introduction

This document reports on the communication portal (see Figure 1) that has been setup for the EURECA project by FORTH. The communication portal has been operational since May 2012. The portal can be found at [http://atlas.ics.forth.gr/INTEGRATE/wiki/index.php/Main\\_Page](http://atlas.ics.forth.gr/INTEGRATE/wiki/index.php/Main_Page)

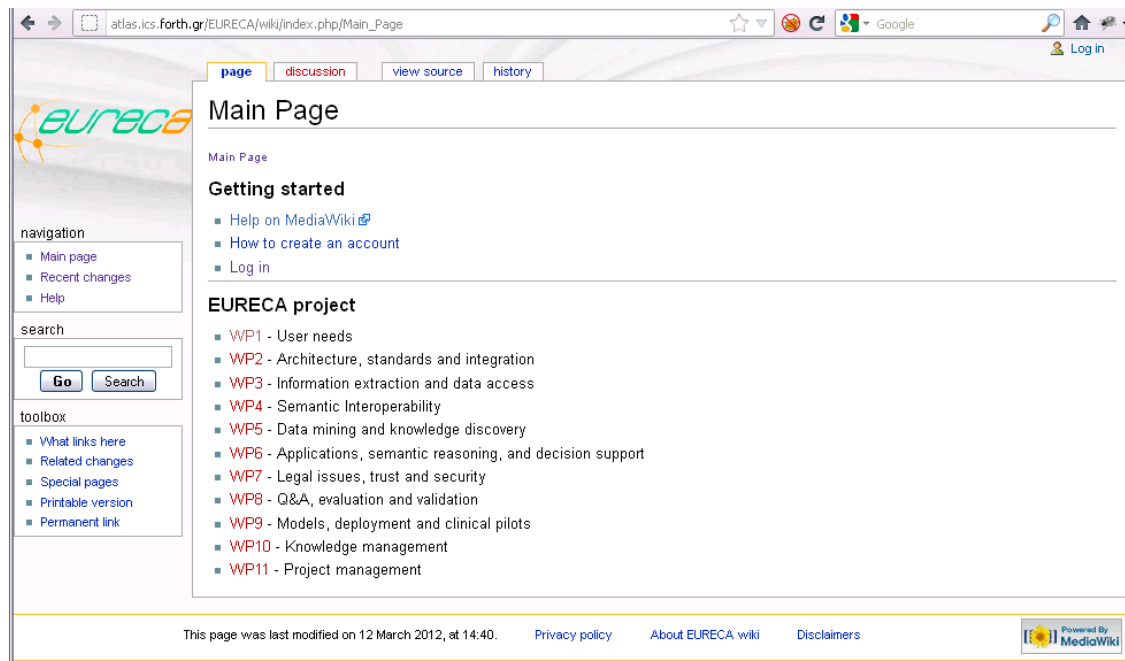

Figure 1 – Communication portal

The communication portal (wiki) is part of EURECA' internal communication and collaboration strategy, aiming to communicate effectively with parties within the consortium. The portal supports content creation and collaborative editing, allowing for easy sharing of knowledge.

The remainder of this document will show some of the portal's current content.

## 2 Content of the portal

### 2.1 Main page

The main page acts as landing spot for visitors. When the portal is loaded, the main page will be displayed (see Figure 1). The home page links to the sub-content for the various work packages.

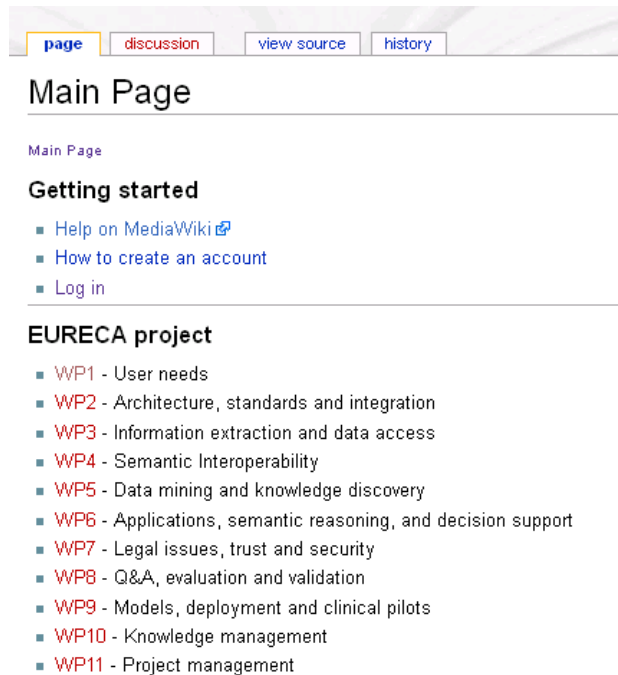

Figure 1 - Main page content

### **3 Conclusion**

The communication portal has been setup and will be used extensively for this project, amongst others to brainstorm and collect materials for the deliverables and for managerial information dissemination (like meeting schedules, etc.).
